

## Range Land Fire Index

**FIRE DANGER TODAY!**

**Firewise ND**

*Think before you burn*

The higher the Range Land Fire Index the more you should limit activities that could start a fire.

### Low

*Weather and fuel indicators show the probability of fire occurrence is low.*

### Medium

*Weather and fuel conditions indicate some potential for fire occurrence. Expect predictable fire behavior with moderate rates of spread.*

### High

*Fires are active. Expect moderate and occasional high rates of spread.*

### Very High

*Fires spread rapidly and show erratic behavior. Dangerous burning conditions exist.*

### Extreme

*Potential for large fires exist. Fires spread rapidly. Extreme fire behavior is probable. Critical burning conditions exist.*

*Think before you burn*

## Help Prevent Wild Fires on Your Farm

- Watch the weather, don't burn on or before a very high or extreme day.
- After burning be sure your fire is out cold to the touch.
- If a fire does start, or gets a way, call the fire department right away.
- Always check your local restrictions before you burn.

For more fire safe information log on to  
[www.firewise.org](http://www.firewise.org) • [www.firerestrictions.org](http://www.firerestrictions.org)

Be sure to have a  
clear zone around your  
fire 4 times the flame height.
